

“Our vision is to live in a safe and engaged community, united around the wellbeing of its youth; creating positive opportunities which promote healthy human development.”

Luce County Communities That Care

Luce County Communities That Care is a coalition based operating system that uses a public health approach to identify and prevent youth behaviors such as:

- ◇ Violence
- ◇ Delinquency / School Dropout
- ◇ Depression / Anxiety
- ◇ Substance Abuse / Prescription Drug Use
- ◇ Teen pregnancy
- ◇ Suicide

This data driven system uses prevention- science research to a positive public health approach to create healthy behaviors. Looking at the risk factors for youth (individual and peer), along with the community and family risk factors the system will use tested and proven programs to start to implement protective factors to buffer the exposure of risk.

Creating positive youth development opportunities.
