[Vulnerable children benefit from promising prevention programme](#)

An alcohol prevention intervention that combined adolescent and parent components delayed onset of regular drinking only among children with low self-control or whose parents were lenient about youth drinking, the very children most vulnerable to developing problems with drink.

[WHO guidelines on identifying and treating problem drinkers in prison](#)

They are there in abundance, but can problem drinkers effectively be treated in prison? Seemingly belying its optimism, the cover of these guidelines juxtaposes the subtitle (“An opportunity for intervention”) against forbidding, barbed wire-topped concrete wall, yet the walls create the ‘dry space’ in which intervention seems possible.
